*** CEA NEWS ***

Goodbye Jim

Jim Brander leaves the post of CJE Editor in July. When Jim began, we did not know each other very well but we have worked closely throughout his time at the CJE. I have nothing but praise for the excellent hard work that Jim has done.

Since his arrival Jim has been a leader in bringing changes to the CJE. The CJE was re-designed and the role of the co-editors enhanced. Democracy was introduced into the selection of the Harry Johnson Prize and a sustained and successful effort was made to reduce and to hold down the time taken from submission to final decision to publication.

The major change has been our move to Blackwell Publishers. This would not have occurred without Jim's persistence. He insisted that the journal needed to move more rapidly into the electronic publishing areas. This could not be done with UTP.

The transition to Blackwell was not without problems and Jim spent hours working on these. As Jim leaves, our relationship with Blackwell has improved markedly due mainly to his efforts. Thanks Jim – from all of us but particularly from the Treasurer.

We welcome **Michel Poitevin**, Montreal as the new CJE Editor. Michel has been a co-editor in recent years as well as our Innes Lecturer last year. Michel will be joined by two new Co-Editors. We wish Michel all the best with the journal.

McGill 2001/McGill 2001

This is the third CEA Meeting outside of the Congress and promises to be one of the best. **James MacKinnon**, Queen's, has organized an excellent set of sessions for the Meeting at McGill and we thank him for his hard work. Local arrangements are being handled by **Chris Ragan** of McGill who has done a wonderful job.

We would like to acknowledge the wonderful financial support provided to this year's CEA Meetings by the Economics Department, the Dean of Art and the Principal of McGill. In addition, Statistics Canada, the Royal Bank, Pearson Education, the Export Development

Corporation, IRPP and the Bank of Canada made financial contributions. Thanks to everyone for enhancing our Meetings.

Calgary in 2002/Calgary in 2002

In 2002, the CEA Meetings will be in Calgary. **Jean-Marie Dufour**, Montreal, will be organizing the program and Ken McKenzie will provide the local organization. We hope to see you in Calgary next year. The likely dates are May 31, June 1-2, 2002. Final confirmation will follow later.

CEA Financial Health/CEA Financial Health

The transition to Blackwell caused some uncertainty about the CEA's financial situation. Blackwell is more expensive than UTP but Blackwell provides better access to electronic distribution and better marketing.

In 1999, the CEA net income was large because we produced a smaller number of pages. For 2000, net income will be close to zero. This reflects a larger journal and the higher costs at Blackwell. We believe that the transition has been a financial success.

In both 1999 and 2000, the CEA meetings had a very small surplus. Our intent is to break even in most years with some room for losses at expensive locations.

The CEA received a SSHRC Travel grant this year and we have urged SSHRC to continue this program. Whether the program will continue for next year's meeting is unknown.

CPP Activities – C. Beach/ CPP Activities - C Beach

Canadian Public Policy/Analyse de Politiques is enjoying a healthy and active period. The number of submitted manuscripts has increased steadily over the last six years and is up to 109 in the year 2000. The finances of the journal are in good shape. The long-time decline in subscription numbers appears to have been arrested in 2000 and subscription revenues took a large step up last year without any change in the subscription rates. The journal also put out two special issues last Fall C one on *Structural Aspects of Unemployment in Canada* in conjunction with the Centre for the Study of Living Standards, and the other of synthesis papers from the Trends Project sponsored by the Policy Research Secretariat of the Privy Council Office. A further special issue is planned for this year on *Linkages Between Economic*

Growth and Inequality organized jointly by the Institute for Research on Public Policy (IRPP) and the Centre for the Study of Living Standards. We have also recently added a new section in the journal on *Critical Essays on Canadian Public Policy* of papers that argue a particular policy position based on evidence and alternatives available. The web page of the journal has been enhanced so that the abstracts (English and French) of all papers published since 1996 are available electronically as well as all papers themselves since March 1996 (downloadable as PDF files) with a one-year lag since hard copy publication. All special issue papers are put on the journal web page at the same time as their hard copy publication.

The March and June issues this year include papers on technological change and the demand for and availability of skills, redesigning employment equity, policies to stem the Brain Drain, reorganization of science funding in Canada, changes in consumption poverty in Canada, the market for home care, physician shortage in Ontario, and disability insurance and labour force participation. Future papers also look at funding policies for post-secondary education and environmental assessment of nuclear fuel waste management. The studies provide substantial contributions to a wide range of current policy issues in Canada.

The Associate Editors have been doing an excellent job in the handling of the increased volume of papers. The area of most dramatic increase of submission has been on health and related issues. As a result, we have been pleased to add Professor Åke Blomqvist of the University of Western Ontario (currently on leave at Health Canada) as an Associate Editor specializing in the health area. The Editorial Board has been expanded slightly to reflect the readership and broader mix of manuscript submissions. I would especially like to thank Elaine Constant for her excellent work as Journal Assistant over the last six years. This will be my last full year as Editor of the journal, and I look forward to a smooth transition to a new Editor in summer 2002.

CEA Nominations/CEA Nominations

Periodically, it is useful to explain the mysteries of how the CEA is governed. In this section, I will outline the process of selecting members to the CEA Executive Council. The Council is the decision-making body of the CEA. The CEA Constitution describes the process by which CEA Officers and members of the Executive Council are elected. There is a Nominating Committee composed of the President,

President-Elect, Secretary-Treasurer and three members of the Executive Council.

The latter are elected from the Council for three-year terms at the December Council meeting. Currently, we select one new member each year to serve on the Nominating Committee. The Nominating Committee meets at the CEA Meetings and prepares a list of nominees for the following year.

I have been part of this process for ten years and can describe what drives the deliberations. For the Council, three factors are important. First and foremost is geography. We consider four regions: West, Atlantic, Ontario and Quebec. Council members always come from all four regions and as someone leaves they are usually replaced by someone from that region. Within a region over time, there is an attempt to spread the Council members across different universities. Ontario is usually under-represented because it has a very large proportion of total universities and CEA members.

Second we have explicitly recruited female economists to the Council and they have been over-represented relative to their proportion of Canadian economists. In recent years, we have deliberately recruited non-university Council members. They come from the Federal Government, CAFE or the non-profit sector.

Third, the Nominating Committee has recruited younger economists who are potential CEA Presidents to the Council.

Finally, the Constitution permits direct nominations from CEA members. Any five members may submit nominations signed by themselves and the nominee by March 1st. Please feel free to contact me about this process.

Coming and Going/Coming and Going

Lars Osberg, Dalhousie will be leaving the CEA Executive this year.

Lars organized our first independent Meeting in 1999 at Toronto.

Curtis Eaton, Calgary is the new CEA Vice-President. He is joined on the new Council by **Dwayne Benjamin**, Toronto, **France Ste Hilaire**, IRPP, **Peter Burton**, Dalhousie and **John Murray**, Bank of Canada. **Francis Woolley**, Carleton, **Garnett Picot**, Statistics Canada, **Lucie Samson**, Laval and **Peter Townley**, Acadia will leave the Executive Council this year. On behalf of the CEA, we thank them for their help.
